

# 2178 L/S-FR Series Flame Retardant Fiber Optic Closure

## Addendum

For use with the 2178 L/S-FR Series Flame Retardant Fiber Optic Closure. Used only if it is to be mounted in a vertical position when application must satisfy flame retardant requirements of Bellcore GR-771-CORE.

When mounted in a vertical position, 3M™ Vertical Fire Barrier Wrap Kit must be applied to the cables entering the closure from the bottom side.

### Kit Contents:

- Firewrap tape
- Fire barrier material

### Application:

- A) Wrap the fire barrier material around each cable, extending downward from the base of the closure 12" (30.5 cm).

*Note: To ease application, material may be wrapped around cable away from closure and then slipped into place before final wrap of tape.*

- B) Hold the material in place with spiral wrapped #69 glass cloth tape. If material edges overlap, fire barrier material may be trimmed to size.

- C) Slide material into place up against bottom ports of closure. Secure material in place with #69 glass cloth tape from fire barrier material down onto the cable sheath.

*Note: The applied material may be overlapped with vinyl tape for appearance, as a final step.*
